

# Data of:

## The Ins and Outs of Involuntary Part-time Employment

*Daniel Borowczyk-Martins*

*Etienne Lalé*

The content of each 97-2003 MS Excel data file is as follows: time series of seasonally-adjusted stocks (normalized by the corresponding population size), and time-series of seasonally-adjusted transition probabilities, corrected for misclassification, margin error, and time aggregation. The data run from January 1976 through December 2018.

### Variable names:

- *F*: Full-time employment.
- *V*: Voluntary part-time employment.
- *I*: Involuntary part-time employment.
- *S*: Involuntary part-time employment, slack work.
- *C*: Involuntary part-time employment, cannot find full-time job.
- *U*: Unemployment.
- *N*: Non-participation.
- $j\_k$ : Transition probability from  $j$  to  $k$ , where  $j, k \in \{F, V, I, U, N\}$  or  $j, k \in \{F, V, S, C, U, N\}$ .
- *Y*: Year.
- *M*: Month.

### Description of data files:

- `series_all.xls`: time series for the working-age population.
- `series_men.xls`: time series for working-age men.
- `series_women.xls`: time series for working-age women.
